

Part B - Question 1: Sourcing Methods

DSIR Recognized R&D; Units

DSIR-recognized companies invest in research infrastructure and innovation. These firms often have differentiated products, technical leadership and long-term capability building, making them strong Federer candidates. Limitation: some emerging companies may not yet have DSIR recognition.

Industry Trade Shows and Expo Directories

Events such as BioAsia, CPHI India, Aero India, IMTEX and ELECRAMA bring together growth-oriented companies. Participation indicates market ambition, product development and expansion intent. Limitation: smaller firms may not participate.

Industry Associations

Directories from IDMA, ACMA, ELCINA and similar associations help identify established businesses in specialized sectors. These databases often provide useful company information and industry positioning.

MCA and Corporate Filings

MCA records provide ownership structure, directors, incorporation details and business classifications. This helps identify promoter-driven companies and screen out unsuitable ownership structures.

LinkedIn and Sales Navigator

Useful for identifying technical founders, leadership teams, hiring activity and expansion signals. Leadership profiles often reveal educational background and industry expertise.

BSE SME and NSE Emerge

Listed SMEs provide transparent information through annual reports, financial statements and management disclosures. This improves research accuracy.

Regulatory Approval Databases

USFDA, WHO-GMP and EU-GMP approvals indicate quality systems, technical capability and export readiness. These approvals are especially valuable in pharma and biotech sectors.

Industrial Clusters and State Portals

Industrial development corporations and cluster databases help identify manufacturing ecosystems where potential Federer companies operate.

Conclusion

A combination of government databases, industry associations, regulatory approvals, trade events and professional networks creates a reliable sourcing system for identifying high-quality Federer companies across India.
